**September 23rd 2021: Mainframe Computers:
Dispelling Myths, Getting to the Facts**

Is your organization making major investments in cloud and other digital technologies? Concerned that your organization has been left behind in the digital revolution? Does the cost and time spent on information technology grow even as time-to-market, the ability to innovate, and enterprise agility degrade? Is leadership pointing the finger at your mainframe computers as the root of all evil? Are consultants and analysts saying that mainframes belong in a museum, not in a modern enterprise? If so, you may find your organization ensconced in a multiyear, multimillion dollar mainframe migration

Kevin Stoodley

Kevin Stoodley is an IBM Fellow and the Chief Technical Officer for IBM Z. Kevin has substantial practical experience as CTO of a broad multi-billion-dollar portfolio of software and hardware products and technologies that span development, runtime, and operations. Kevin holds 39 patents across a range of technical areas. He has deep experience across a wide variety of hardware and software platforms from embedded systems to mainframe. Kevin is a strategic thinker tempered with a grounding in practicality. His recent focus has been on merging open source and cloud technologies with enterprise hardware and software to bring innovation, agility, and experience of the former to the qualities of
