Why is it that some people can be overweight, consume the wrong foods and live on their couches and still seem to be quite healthy, while others can be of normal weight, watch their diets and exercise copiously and yet be quite sick? What ultimately determines your state of wellness is not your weight but the levels of toxic fat in your blood. We need to change forever how we look at the fat on our body and its impact on the future of health care. We also need to consume the missing ingredient to optimal health. This ingredient in the right quantities can help curb inflammation and all the di
