

Awakening to Conscious Co-Creation Archives Available
February 19th 2014: Quantum Creativity

Amit Goswami will discuss his work and brand new book to be published in March. The main message of his book, Quantum Creativity is this: If you are interested in creativity and in thinking quantum, you have the basics of what it takes to be creative, in fact, to be extraordinary in your creativity. Quantum physics is the physics of possibilities. Quantum physics says reality is both possibility and actuality. The objects of the universe are quantum possibilities; they become objects of actuality in our experience when we observe because we have chosen actuality from the possibilities proffer

Amit Goswami, Ph. D.

Amit Goswami, Ph. D. is a professor of physics (retired) at the University of Oregon, Eugene, OR, where he served since 1968. He is a pioneer of the new paradigm of science called science within consciousness, an idea he explicated in his seminal book, The Self-Aware Universe, where he also solved the quantum measurement problem elucidating the famous observer effect. Amit has written seven other books based on his research on quantum physics and consciousness. In The Visionary Window, he demonstrated how science and spirituality could be integrated. In Physics of the Soul Amit developed a theory of survival after death and reincarnation. His book, The Quantum Doctor integrates conventional
